

# BP601G1 Tech Sheet

**Customer:** Balboa Water Group

**Part Number:** 56498-05 3.0kW 825 Incoloy  
56499-06 3.0kW Titanium  
59393 2.0kW 825 Incoloy

Custom Box Overlay   
Box Overlay Part Number N/A

CE System Model For 2.0KW: BP6-BP601G1-RCA-2.0KW

CE System Model For 3.0KW: BP6-BP601G1-RCA-3.0KW

Software Version ID: M100\_206 V44.0

Software Version: 44.0

File Name: BP601\_44.0\_BP601G1.hex

Configuration Signature: 0B27D306

Eng. Project Number: 5302

Control Panels (See later pages for more information):

spaTouch™2 Any version (version 2.0 or later required for bba™2 fully integrated functionality; version 2.19 or later required for CHROMAZON3™ support)

Icon spaTouch™ Any version (version 3.36 or later required for bba™2 fully integrated functionality)

Menued spaTouch™ Any version (version 2.8 or later required for bba™2 integrated functionality)

TP800 Version 3.1 and later (Version 3.13 or later required for bba™; version 4.11 or later required for bba™2 integrated functionality)

TP600 Version 2.7 and later (Version 2.12 or later required for bba™/bba™2 On/Off control via menu)

TP400T CE Version 2.7 and later (TP400T US should not be used) (Version 2.12 or later required for bba™/bba™2 On/Off control via menu)

TP400W CE Version 2.7 and later (TP400W US should not be used) (Version 2.12 or later required for bba™/bba™2 On/Off control via menu)

Manufactured under one or more of these patents. U.S. Patents: 5332944, 5361215, 5550753, 5559720, 5,883,459, 6253227, 6282370, 6590188, 6976052, 6965815, 7030343, 7,417,834 b2, Canadian Patent: 2342614, Australian patent: 2373248 other patents both foreign and domestic applied for and pending. © Copyright 2009 Balboa Water Group.

|  |      |          |            |   |

bba™ & bba™2 (Balboa Bluetooth Amp) connection is documented seperately.

bba™ is integrated into graphic display panels (TP800, TP900 and spaTouch™). With TP600/TP400, use the "BT" entry on the menu to toggle bba™ power On/Off.

bba™ 2 is integrated into graphic display panels (TP800, TP900 and spaTouch™). With TP600/TP400, use the "BT" entry on the menu to toggle bba™ 2 power On/Off.

# Basic Functions Setup 1 - 6

## Power Requirements:

**Single Service** [3 wires (line, neutral, ground)]  
230VAC, 50/60Hz\*, 1p, 16A, (Circuit Breaker rating = 20A max.)

**Single Service** [3 wires (line, neutral, ground)]  
230VAC, 50/60Hz\*, 1p, 32A, (Circuit Breaker rating = 40A max.)

\* BP systems automatically detect 50Hz vs 60Hz. However, power frequency (50Hz vs 60Hz) is just one of many differences between North American (UL) and CE power, and it is because of these other differences that different BP systems must be used for UL vs CE territories. Also, there are a few countries that use CE power but 60 Hz (such as South Korea) which need CE systems, and a few countries that use UL power but 50 Hz which need UL systems.

### HiPot Testing Note:

Disconnect slip terminal with green wires from J52 prior to performing HiPot test. Failure to disconnect may cause a false failure of the test. Reconnect terminal to J52 after successful completion of HiPot test.

## System Outputs:

|              |                    |         |                |   |
|--------------|--------------------|---------|----------------|---|
| Pump 1       | 230VAC             | 2-Speed | 6.5A - 12A max | 15-minute timer (30-minute timer for P1 Low in non-circ setups only)  |
|              |                    |         |                | Pump size is dependent on service available (16A vs. 32A), other equipment installed, and if A5 is set to ON for Special Amperage Rule B. in Setups 1, 3, 5, this is the heater pump.<br>Must deliver 20 GPM through heater<br>NOTE: A circ pump cannot be used with a 2-speed pump in this system. See the BP601G2.<br>1 Speed in Setups in Setups 2, 4, 6 |
| Pump 2       | 230VAC             | 1-Speed | 6.5A - 12A max | 15-minute timer   |
|              |                    |         |                | Pump size is dependent on service available (16A vs. 32A), other equipment installed, and if A5 is set to ON for Special Amperage Rule B. Used in setups 1 & 2  |
| Blower       | 230VAC             | 1-Speed | 4A max         | 15-minute timer   |
|              |                    |         |                | Used in Setup 3 & 4   |
| Circ Pump    | 230VAC             | 1-Speed | 2A max         | Programmable Filtration Cycles + Polling  |
|              |                    |         |                | This is the heater pump in Setups 2, 4, 6.<br>Must deliver 20 GPM through heater  |
| Ozone        | 230VAC             |         | .5A max        | Slaved to Circ Pump in Circ Setups and to Pump 1 Low in Non-Circ Setups   |
| Spa Light    | 10VAC              | On/Off  | 2A** max       | 240-minute timer.   |
| A/V (Stereo) | 230VAC             | Hot     | 2A max         | Always on   |
| Heater       | 3.0kW @ 240VAC max |         |                |   |

\*\* 2A max limit is shared by On/Off Spa Light and CHROMAZON<sup>3</sup>™.

# Changing Software Setups with spaTouch™ Icon-Driven Panels

## Test Menu Access (S1, Switch 1 ON) *Service Technician ONLY.*

**DANGER! HIGH VOLTAGE WILL BE ACCESSIBLE! SERVICE TECHNICIAN ONLY!**

While the system is running, move DIP Switch 1 (on S1 on the Main circuit board) to ON. The system will enter Test Mode. Moving DIP Switch 1 to OFF will exit Test Mode.

The example screens shown here are from the spaTouch 1 Icon-Driven Panel, but the screens on the spaTouch 2 Panel are similar. The main difference is that the spaTouch 2 display is wider.

## To Change Software Setups:

While in Test Mode, press the indicated icons to move from screen to screen.

Once on the Setup Selection screen, press the Up or Down icon to select the desired Setup Number, then press the Check Mark icon to confirm and to have the spa restart.

After the system restarts, you may see a message that "The settings have been reset"; this is normal after changing Setups with DIP Switch 6 in the OFF position. Press "Clear" to dismiss this message.

# Changing Software Setups with TP800 / TP900 / spaTouch™ Menued Panel

## Test Menu Access (S1, Switch 1 ON) *Service Technician ONLY.*

**DANGER! HIGH VOLTAGE WILL BE ACCESSIBLE! SERVICE TECHNICIAN ONLY!**

While the system is running, move DIP Switch 1 (on S1 on the Main circuit board) to ON.  
The system will enter Test Mode.  
Moving DIP Switch 1 to OFF will exit Test Mode.

## Software Setups

Under the TEST Menu, the Setup screen will allow changing the Setup from 1 to any number established by the Manufacturer.  
Changing the Setup may require wiring changes as well.

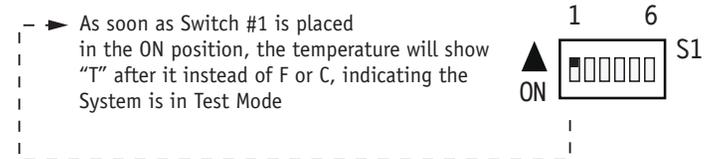

Note: The Timeouts and Temp Limit selections should NEVER be changed. They are for safety agency testing purposes only.

# Changing Software Setups with TP600 / TP400

## Test Menu Access (S1, Switch 1 ON) *Service Technician ONLY.*

**DANGER! HIGH VOLTAGE WILL BE ACCESSIBLE! SERVICE TECHNICIAN ONLY!**

While the system is running, move DIP Switch 1 (on S1 on the Main circuit board) to ON. The system will enter Test Mode. Moving DIP Switch 1 to OFF will exit Test Mode.

## Software Setups

Under the TEST Menu, the Setup screen will allow changing the Setup from 1 to any number established by the Manufacturer. Changing the Setup may require wiring changes as well.

**You will have 1 minute** to complete the setup change after you manually exit Priming Mode. (Once familiar with the process, the Setup change should take less than 15 seconds.)

When the panel displays RUN PMPS PURG AIR, press any Temperature button ONCE to exit Priming Mode. You should see “---T” where the T indicates the system is in Test Mode.

Continued on Next Page.

# Changing Software Setups with TP600 / TP400 Continued

Again, **You will have 1 minute** to complete the setup change after you manually exit Priming Mode.

Immediately after exiting Priming Mode, press this sequence of buttons: Warm\*, Light, Warm, Warm, Warm, Warm. Continue to press Warm until the display shows the Setup Number (S-01, S-02, etc.) you want to switch to. When the correct setup number is showing, press Light once, and the system will reset, using the newly-selected Setup from that point on.

Move DIP Switch 1 to the OFF position to take the spa out of Test Mode. °F or °C will replace °T.

**Using a permanent marker, write the Setup number on the Setup label mounted inside the system lid (right). This is very important to any service person in the future who may need to replace a circuit board or system and needs to change the Setup on a replacement part while in the field.**

NOTE: Changing the Setup may require wiring changes as well - refer to the wiring diagram or wiring diagram addendum.

# Equipment Expansion

---

## Expansion Features

### Control Connection

Relay 1/2 (J108)

### Default

None

### Fuse

None

# DIP Switch Functions

## Fixed-function DIP Switches

- A1 Test Mode (normally Off).
- A2 In "ON" position, add one high-speed pump (or blower) with Heater.
- A3 In "ON" position, add two high-speed pumps (or 1 HS Pump and Blower) with Heater.
- A5 In "ON" position, enables Special Amperage Rule B. See Special Features section under Configuration Options for functionality with your system.  
In "OFF" position, enables Special Amperage Rule A.
- A6 Persistent memory reset (Used when the spa is powering up to restore factory settings as determined by software configuration).

**A2 and A3** work in combination to determine the number of high-speed devices and blowers that can run before the heat is disabled. i.e. A2 and A3 in the ON position will allow the heater to operate with up to 3 high-speed pumps (or two HS Pumps and Blower) running at the same time. Heat is disabled when the fourth high-speed pump or blower is turned on.

**Note:** A2/A3 all off = No heat with any high-speed pump or blower.

## Assignable DIP Switches

- A4 In "ON" position, enables a 5-minute cooldown for some gas heaters (Cooling Time B).  
In "OFF" position, enables a 1-minute cooldown for electric heaters (Cooling Time A).

*Undesignated switches are not assigned a function.*

# Jumper Definitions

|                      |   |  |
|----------------------|---|--|
| <b>J109</b>          | Non Applicable on CE models   | J109    |
| <b>J30</b>           | Do Not Use  |  |
| <b>31</b>            | Jumper on 1 pin with 2.0kW or smaller heater<br>Jumper on 2 pins with a 3.0kW or higher heater  | J31  59393-XX<br>Jumper setting varies by system model which is shown to the right of the jumper. |
|                      |   | J31  56498-XX, 56499-XX   |
| <b>J29</b>           | Heater Disable Switch Connection. If J29 is shorted by any means, the heater will not run until J29 is no longer shorted.<br>If J29 is shorted during power-up “J29” will appear on the panel.<br>The message can be dismissed with a button press, and is the only control panel notification of J29 being shorted.<br>No message is displayed if J29 is shorted after power-up, but the heater will not run until J29 is no longer shorted.<br>J29 expects a switch closure (not a voltage) as the command signal.<br>In some areas, a local power company may offer discounts based on voluntary “power shedding” devices that may be installed in conjunction with the spa. | J29   |
| <b>J25, J26, J27</b> | Heater Type Settings.<br><b>Note:</b> <i>Factory Configured do not change.</i>  |   |
| <b>J44</b>           | Jumper must be on center two pins (230V) for CE Systems.  | J44   |

## Warning!

Setting DIP switches or jumpers incorrectly may cause abnormal system behavior and/or damage to system components.  
Refer to Switchbank illustration on Wiring Configuration page for correct settings for this system.  
Contact Balboa if you require additional configuration pages added to this tech sheet.
