

Ultra Radiance™

For crystal clear water.

The spa care improvement that brings you clearer water.

BioGuard Spa® Ultra Radiance™ helps maintain sparkling clear spa water. Ultra Radiance destroys irritating chloramines and soluble organic wastes (such as urine, perspiration and sunscreen), which can cause dull cloudy water, reduce chlorine effectiveness and increase chlorine consumption.

Ultra Radiance does **not** contain chlorine.

In bromine systems, regular oxidation helps regenerate the bromine reserve (HOBr) and keep water fresh. In chlorine systems, it destroys organics that consume free chlorine, improving clarity and comfort. Consumers can enjoy their spa as soon as one hour after treatment.

- **Chlorine-free shock**
- **Rapid oxidation of organic wastes**
- **Compatible with bromine or chlorine spa programs**
- **Simple weekly care and post-spa use boost**
